ABOUT ME

I am an aspiring architect with a growing passion for community-based design, photorealistic rendering, and storytelling through visuals. With four years of experience in events, product and portrait photography, I bring a keen eye for composition, light, and detail into my architectural work. My design approach is rooted in creating spaces that are people-focused, context-aware, and emotionally engaging. I also have hands-on experience in construction, which informs my practical understanding of materials and building processes. I strive to merge creativity with functionality, always aiming to design spaces that serve, inspire, and connect

LANDSCAPE DESIGN

PROJECT TITLE: LANDSCAPE RESDESIGN OF A FACULTY IN FUTA

TYPE : ACADEMIC

SOFTWARE USED :
-REVIT
-LUMION

DESCRIPTION : This was a practical design for the course Arc 403 (landscape)

The design was aimed at recognizing the defects in the current landscape design and how improvements can be made without destroying the existing landscape. Emphasis is placed on local plants , tress and ornamental flowers while creating spaces to foster and boost the ever declining human connection

IBULE COMMUNITY SECONDARY SCHOOL

PROJECT TITLE : IBULE COMMUNITY SECONDARY SCHOOL

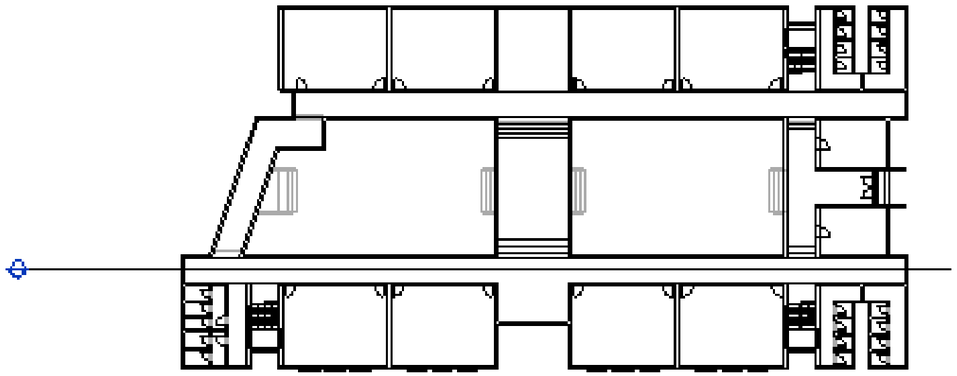

TYPE: ACADEMIC

SOFTWARE USED: REVIT

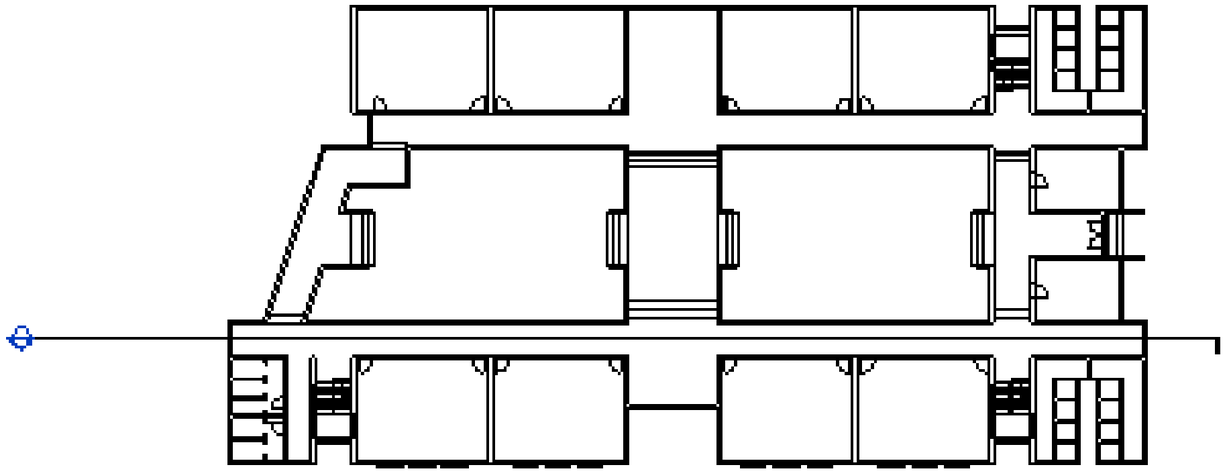

DESCRIPTION:

This project was concieved as a remedy to the uncontrolled, unplanned urban sprawl happening to the Ibule community. The design process embraced the five human senses, recognizing that in a context like Nigeria—where access to advanced systems is limited especially in rural areas — architecture must connect with people on a more immediate, sensory level.
